3. **Record your User Key**
   a. At the top right side of the account home page is "Your User Key', see Figure 6 - User Key. This is an alphanumeric string. Please take a screenshot of this and save it to your computer.

INFORMATION

You will need to send your user key to Cypress Embedded Systems. This is one of two pieces of information that are needed to get your PowerMonitor to work.

You should have received a copy of the license along with this work. If not, see http://creativecommons.org/licenses/by-nc-sa/4.0/.

b. On the web page "Create New Application/API Token", see Figure 8 - Create New Application/API Token, perform the following steps.
   i. Enter the name "PowerMonitor" in the Name field.
   ii. (OPTIONAL) By default, push notifications received by this application use the Pushover icon. If you like you can use an icon we (can) provide, or one of your choice or creation.
   iii. Check off the box accepting the terms of service.
   iv. Click on the button "Create Application".

You should have received a copy of the license along with this work. If not, see http://creativecommons.org/licenses/by-nc-sa/4.0/.

5. **Record API Token**
   a. After creating the application, you will be taken to the applications web page, see Figure 9 - Application Created. At the top of this page will be application API Token/Key that was created. Take a screenshot of this API Token and save it to your computer.

INFORMATION

You will need to send your user API Token to Cypress Embedded Systems. This is the second piece of information that is needed to get your PowerMonitor to work.

You should have received a copy of the license along with this work. If not, see http://creativecommons.org/licenses/by-nc-sa/4.0/.

6. **Send User Key and API Token to Cypress Embedded Systems**
    a. Email your **User Key** and **API Token** to mike@cypressembeddedsystems.ca. This information is critical for getting your PowerMonitor to work.
    b. After completing the last step you can return to your account home page and log out of the desktop application.

INFORMATION

After completing this step you can return to your account home page and log out of the desktop application.

Send your User Key, the application API Token, and what device platforms you will be using to Cypress Embedded Systems.

Pushover is an application that requires a license to operate after a 30 day evaluation period. The PowerMonitor device includes a license for up to two device platforms, Android or Apple iOS. Multiple devices of the same platform are covered under the same license.

Wait for a response from Cypress Embedded Systems before proceeding to the next step.

---

7. **Download Pushover application onto your phone**
    a. Once you have received confirmation back from Cypress Embedded Systems that your information has been received and processed, download the Pushover application onto each smartphone you plan to use with your PowerMonitor device. ***Use the same login credentials on each device***. Each device you login with will be recorded on your Pushover account, and the license should automatically be activated.
